

## **RBP4 Monoclonal Antibody**

Catalog No: YM0554

Reactivity: Human

**Applications:** WB;IHC;IF;FCM;ELISA

Target: RBP4

Gene Name: RBP4

Protein Name: Retinol-binding protein 4

P02753

Q00724

Human Gene Id: 5950

**Human Swiss Prot** 

No:

**Mouse Swiss Prot** 

No:

**Immunogen:** Purified recombinant fragment of human RBP4 expressed in E. Coli.

**Specificity:** RBP4 Monoclonal Antibody detects endogenous levels of RBP4 protein.

**Formulation :** Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Monoclonal, Mouse

**Dilution:** WB 1:500 - 1:2000. IHC 1:200 - 1:1000. IF 1:200 - 1:1000. Flow cytometry:

1:200 - 1:400. ELISA: 1:10000. Not yet tested in other applications.

**Purification :** Affinity purification

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

Molecularweight: 23kD

#### **Background:**

retinol binding protein 4(RBP4) Homo sapiens This protein belongs to the lipocalin family and is the specific carrier for retinol (vitamin A alcohol) in the blood. It delivers retinol from the liver stores to the peripheral tissues. In plasma, the RBP-retinol complex interacts with transthyretin which prevents its loss by filtration through the kidney glomeruli. A deficiency of vitamin A blocks secretion of the binding protein posttranslationally and results in defective delivery and supply to the epidermal cells. [provided by RefSeq, Jul 2008],

#### **Function:**

disease:A deficiency of vitamin A blocks secretion of the binding protein post-translationally and results in defective delivery and supply of vitamin to the epidermal cells (a condition associated with a dermatosis).,disease:Defects in RBP4 are a cause of retinol-binding protein deficiency [MIM:180250]. This condition causes night vision problems. It produces a typical "fundus xerophthalmicus," featuring a progressed atrophy of the retinal pigment epithelium.,function:Delivers retinol from the liver stores to the peripheral tissues. In plasma, the RBP-retinol complex interacts with transthyretin, this prevents its loss by filtration through the kidney glomeruli.,mass spectrometry: PubMed:12237133,mass spectrometry: PubMed:7666002,online information:Retina International's Scientific Newsletter,online information:Retinol-binding protein 4 entry,similarity:Belongs to the calycin superfamil

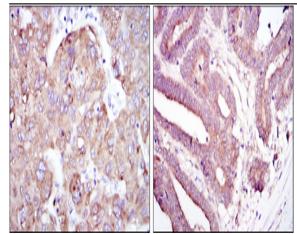

# Subcellular Location :

Secreted.

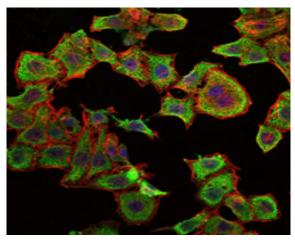

**Expression:** 

Detected in blood plasma and in urine (at protein level).

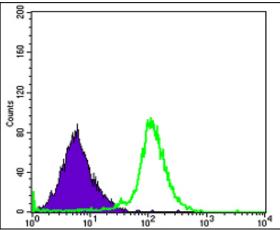

### **Products Images** 1 2 Western Blot analysis using RBP4 Monoclonal Antibody against kDa HEK293 (1) and RBP4-hlgGFc transfected HEK293 (2) cell 170-130lysate. 9:5-72-55-4:3-34-26-17-11-

Immunohistochemistry analysis of paraffin-embedded liver cancer tissues (left) and stomach cancer tissues (right) with DAB staining using RBP4 Monoclonal Antibody.

Immunofluorescence analysis of HepG2 cells using RBP4 Monoclonal Antibody (green). Blue: DRAQ5 fluorescent DNA dye. Red: Actin filaments have been labeled with Alexa Fluor-555 phalloidin.

Flow cytometric analysis of HepG2 cells using RBP4 Monoclonal Antibody (green) and negative control (purple).
